The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a programmable lock detection in a multi-phase clock generator i.e. dll that outputs multiple clock signals wherein a count value with the multi-phase clock generator is compared to a accuracy level i.e. BITSEL to determine a stable operating point and once this stable operating point is established a signal is sent to a phase check circuit so as to enable the phase check circuit to compare the reference clock signal of the multi-phase clock generator to "two or more clock signals" of the multi-phase clock generator.

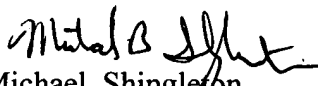

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Shingleton whose telephone number is 571-272-1770. The examiner can normally be reached on IFW.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bob Pascal can be reached on (571) 272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
